COMMONWEALTH BUREAU OF CENSUS & STATISTICS
EMPLOYMENT IN LARGER PRIVATE FACTORIES - STATE DETAILS

APRIL, 1962

Information on changes in employment in the larger privately-owned factories, derived from a monthly survey carried out by collaboration between the Department of Labour and National Service and the Bureau of Census and Statistics, is published regularly in the "Monthly Bulletin of Employment Statistics". The attached tables, which should be read in conjunction with Tables 12 to 16 in the March, 1962 Bulletin, provide more detailed information as to employment in the various industrial groups in each State.

Particulars of the principal changes in the level of employment between March and April, 1962 in each of the five mainland States are shown for factories engaged in the manufacture of food, drink and tobacco in Table 1 and for other factories in Table 2. In these tables, although employment variations for all industries in each industrial group have been included in the group totals, minor variations in individual industries have not been shown separately. The industry figures shown cannot, therefore, be added across to give totals for the five mainland States.

Table 3 gives details of employment by industrial groups in each of the five mainland States, and a finer division by industry sub-groups is shown in Table 4.

For Tasmania, the principal changes in the level of employment between March and April, 1962 are shown in Table 5. Minor variations in individual industries have not been shown separately. Employment in the main industrial groups is shown in Table 6. Owing to the risk of disclosure of individual factory particulars, these figures cannot be made available in the same detail as those for other States.

Total employment in all factories surveyed decreased by 4,411 (-632 males, -3,779 females) between March and April, 1962. Employment increased in Queensland (+364), but decreased in Western Australia (-94), Tasmania (-105), New South Wales (-167), South Australia (-857), and Victoria (-3,552). The employment level in April, 1962 was 5,251 higher than in April, 1961.
